

CUSTOMER SUCCESS STORY

AUSTRALIAN INTERNATIONAL ACADEMY OF EDUCATION, CAROLINE SPRINGS, VICTORIA

Multiple Campus Transformation

The Australian International Academy of Education (AIAE), contacted Grassports for the multiple campus make over. We were given a tight time frame to work with and completed the project to the requirements and with fantastic end results. The staff and students have been utilizing both sports fields and the community has been very impressed with what they have seen.

The project included resurfacing the junior school oval including a basketball court and running track, as well as multisport recreation area with Signgrass play artworks. At the senior school we redeveloped the school oval, running track and adding a large outdoor chess board. Using only **100% Australian made** synthetic turf which is locally produced and hard wearing.

Grassports looks forward to keeping a strong relationship with AIAE, we will be visiting regularly to do the ongoing maintenance of the facilities as well as starting another exciting project at the Coburg campus.

"We looked at several companies but decided to go with Grassports as they promised to get the work done in the short period of time given to them. We were grateful that we chose Grassports. Not only was the process easy and stress free, we were pleased with the professionalism of the entire team. Grassports maintained a high level of communication with us, keeping us updated throughout the construction process. Both sites were completed in a very short period of time, and the final product was of high quality, had an excellent feel to it, and looked outstanding. I highly recommend Grassports to any school or sporting club wishing to upgrade their sports fields".
