# CUSTOMER SUCCESS STORY

MENTONE GIRLS' GRAMMAR SCHOOL

### *A fun environment for active students to learn and grow*

Working closely with the school to ensure the design requirements were spot on was integral to the success of this project. Keeping the school informed, providing design expertise over a 3 year period and evidence of our work in other schools was instrumental in Mentone Girls' Grammar Schools decision to employ Grassports Australia.

The extensive works included a superb 7000m$^2$ hockey/tennis field with synthetic surfacing approved by FIH and ITF, coaches boxes and spectator seating. A 4 lane running track into a long jump pit with a retracting cover on the outside of the playing field. A 2000m$^2$ old asphalt surface was transformed with the application of acrylic surfacing and multi sport line marking. Landscaping complete with full irrigation system, retaining walls and seating tied the old area with the new with spectacular results.

We are proud to have provided this facility for Mentone Girls' Grammar School and its active student population.

***"Grassports were able to provide advice and guidance on the design and development of the facility, even prior to their appointment. During their time on site, I found their team professional, enthusiastic and committed to obtaining the best result for the School. ……"*** - *Brian Trumble, BUSINESS MANAGER*
