

CUSTOMER SUCCESS STORY

BALLARAT HIGH SCHOOL, BALLARAT, VICTORIA

Ballarat High School Boats Brand New Multi-Sport Facility

Grassports was contacted by AW Nicholson to complete the multi-sport facility at Ballarat High School. We have worked together successfully with them closely on several other projects. This project was through the VSBA.

The extensive works included compacting a dust layer over the existing asphalt. Grassports then supplied and installed 3,710m² of Poligras ECO HT synthetic grass and sand infill. Line markings for 6 tennis courts, 2 netball courts, hockey D and 4-lane running track. New technology incorporates "Cool Plus" turf reducing heat, the turf is also certified by sports peak bodies ITF (tennis) and FIH (hockey). Grassports proudly uses **100% Australian made** synthetic turf!

Ballarat High School prides itself on their fantastic recourses and they have just added another facility to boast about. Grassports is proud to have provided another great asset for the school and local community.
