

CUSTOMER SUCCESS STORY

BELGRAVE HEIGHTS CHRISTIAN SCHOOL, BELGRAVE HEIGHTS, VICTORIA

Belgrave Heights Christian School's whole school transformation

Grassports was selected to undertake two projects at Belgrave Heights Christian College, they chose to use us because of our helpful team who were happy to answer any questions and change designs around to suit their criteria.

Grassports supplied and installed Coolplay synthetic turf for the undercover COLA area with line markings for 4 x junior basketball keys, line marking for netball and 2 x hop scotch's. We also installed a 4.2m chain wire mesh fence behind the goals and finished with new netball towers and sleeves.

The second project was the school oval and two-lane running track, which we designed for the school. We completed the surfacing for the oval in HB240 synthetic turf with white sand and black SBR rubber infill, this was a very complex install.

The two-lane running track, surrounds and cricket wicket were completed in Court Turf PE.

Belgrave Heights Christian Schools staff and students are loving the new areas! We look forward to keeping in touch regularly for ongoing maintenance of the surfaces.
