

# CUSTOMER SUCCESS STORY

CROYDON HILLS PRIMARY SCHOOL, VICTORIA

## ***Hot Shots multipurpose facility for vibrant active school***

Old asphalt courts have been revitalised and rejuvenated with high quality, durable synthetic grass to produce a multisport surface for the school's dynamic learning community of over 700 students.

Working closely with the school to ensure the design requirements were spot on was integral to the success of this project. The line markings including eight hot shots courts had to remain clear whilst still allowing for netball and basketball markings to be easily visible as well.

Recommendations and evidence of our work in other schools was instrumental in Croydon Hills Primary School's decision to employ the expertise of Grassports Australia.

The result not only greatly improves the functionality of this multisport area benefitting the whole school community, but also significantly brightens up the whole school ground.

We are happy to report that the customer is thrilled with the finished product and we look forward to working with Croydon Hills Primary School into the future.
