

CUSTOMER SUCCESS STORY

DEEPDENE PRIMARY SCHOOL, VICTORIA

Multipurpose Play Area Upgrade at Deepdene Primary School

Grassports were engaged by the school to come up with an active fun play area to replace the old and worn-out synthetic surface.

Grassports removed tree roots that were causing issues on site and replaced with a crushed rock base ready for the new surface, 625m² of 100% Australian made (manufactured in Melbourne) *Tennis 10* synthetic surface. We supplied and installed blue for the surrounds, green for the five bat tennis courts, red for the running track, while incorporating line markings for two hopscotch areas.

The school's staff and students could not be happier with the new multisport area we provided, which the school is eager to use with students returning after COVID lockdowns. Grassports looks forward to the ongoing positive relationship with the school.

"The ability to problem solve and work with us during construction lockdowns, tree roots and wet weather was impressive."

The ultimate outcome is amazing and the students are thrilled with the running track and four square courts. We highly recommend Grassports to any school looking to transform a new outdoor area." – Christine Vlahos Principal
