

CUSTOMER SUCCESS STORY

TENNIS COURT, FLINDERS, VICTORIA

Tennis Court Surfacing in Flinders

Having worked with the builder Original Projects numerous times on other projects, they had no queries getting in touch again for the surfacing and lighting works at this beautiful home in Flinders, Victoria.

Grassports supplied and installed *Supergrasse Pro Bounce Cool Plus* synthetic surface in London Blue. The surface is proudly **100% Australian made** and manufactured here in Melbourne. The court features a basketball tower on one end for versatile use of the court.

We used 4 x Blade LSI lights for the lighting component which are a sleek and stylish finish to compliment the black powder coated tennis net posts.

Overall the project was a success and the builder, and their clients are absolutely thrilled with the tennis court transformation. Grassports looks forward to working with Original Projects again in the future.
