

CUSTOMER SUCCESS STORY

HALLAM SENIOR SECONDARY COLLEGE, HALLAM, VICTORIA

Hello Hallam Secondary!

Grassports began the works at Hallam Senior Secondary College with temporary fencing to the entire works for the safety of staff and students, also with a traffic management plan to ensure no disruption to school movement.

We removed the existing fencing and concrete infrastructure on the perimeter of the court. New concrete spoon drains and edge beams were installed to the perimeter of the courts including connection to the existing drainage, with new pit cover and lid.

Grassports supplied and installed a crushed rock base to the court varying in depths across the courts to the required levels. Then using 100% Australian made (manufactured in Melbourne), *SUPERGRASSE* multi-sport synthetic turf. We supplied and installed blue for the courts and red for the running track, while incorporating line markings for netball, tennis and a two-lane numbered sprint running track with 5m tabs on the inside of the track.

Finishing the project with matchplay deluxe nets, new basketball towers and netball sleeves all with hinged cap sleeves into new ground footings, posts, nets, and protective padding with Hallam Senior's school logo.

The school, its staff and students could not be happier with the new courts we provided, which are ready to use as promised for the 2021 school year! Grassports looks forward to the ongoing positive relationship with the school and maintaining the courts.

"Grassports delivered a new playing field that immediately lifted morale and participation of students throughout the school. Grassports maintained a high level of communication through the construction process. They met all timelines and provided regular updates on their process. The project provided an outcome that not only resulted in a significant upgrade to our sporting facilities but also generated an increased sense of pride amongst staff and students. The outcome has been an exceptional finish.
