

CUSTOMER SUCCESS STORY

HUNTINGTOWER SCHOOL, MOUNT WAVERLEY, VICTORIA

Expertise Provides Magnificent Results for Huntingtower School Community.

Grassports was thrilled to be selected for the hockey field resurface for our new client Huntingtower School. We were awarded the contract because of our industry expertise, solid reputation and use of Australian made products.

Grassports removed the deteriorated existing surface and rubber shock pad, while undertaking some minor base repairs. We then installed a new Instu paved rubber shock pad and resurfaced in 100% Australian made *Poligras HT*. The main field was laid in field green, while the outer surrounds in blue including the yellow lines for hockey, and hockey practice D's. Grassports also included lines for netball and European handball in white.

The school and its large student population are extremely happy with the result and high-quality workmanship on the field we provided. We look forward to a close ongoing relationship with the school including the maintenance the field.

"Can I compliment your team on the process, from your prompt dealings and expertise, helpful design suggestions and the timely schedule. Always respectful of the school operations, traffic movements and students. Your team was courteous and kept the site clean. Many thanks for delivering the project on time and on cost. The final handover was smooth and there have been no rectifications required. We look forward to working with you for the maintenance and upkeep of the surface to maintain the quality and standard of the laid surface". – Rob Kitchingman (Project & Marketing Manager)
