

CUSTOMER SUCCESS STORY

PORTSEA, VICTORIA

Superb Resurface at Private Court in Portsea

The customer contacted Grassports to resurface the tennis court and replace the draw netting at their property and are absolutely thrilled with the result.

Grassports went in and removed the old surface, then installed the 100% Australian Made *Probounce PE* synthetic grass surface complete with the tennis court line markings which are tufted in during manufacture. We installed green fine grade kiln dried sand which creates an extra 'wow' on completion, along with new tennis nets and posts.

"After making the decision to resurface our tennis court we engaged Grassports to complete the work. The team were extremely professional and did a brilliant job. The new look has given the garden and house a whole new look and feel and we could not be happier with the end result. I highly recommend Grassports if you are considering upgrading your tennis court." – Martin (Home Owner)
