

CUSTOMER SUCCESS STORY

TED SUMMERTON RESERVE, MOE, VICTORIA

Netball Court Surfacing

Grassports was selected by La Trobe City Council to complete the surface upgrade at Ted Summerton Reserve in Moe, because of our expert opinions and 50+ years' experience under our belt.

The 735m² approx. of asphalt had to have a high-pressure wash and terrazzo grinding to remove any dirt and grime before any coats of Laykold could be applied.

We applied 1 coat of Laykold Acrylic Resurfacer to the total area and then 2 topcoats of Laykold Advantage. Finishing with white netball lines.

The local community is thrilled with the result and are loving playing local competition on the court.

"I wanted to pass my thanks onto Jake and the boys in regard to the works completed. I thought they were completed to a very high standard, efferently without any fuss. It has been a pleasure working with your business and I look forward to working with you again in the future". – Eanna Donnelly (Senior Project Manager La Trobe City Council)
